www.mindfulpath.ca

Supported by

Phil Jacobs

ADS, Integrated Vibrational Therapist and Sound Healer
www.torontosoundtherapy.com

Many areas within North America allow helping professionals to learn and implement the National Acupuncture Detoxification Association's (NADA) 5-needle Acudetox Protocol. The NADA Protocol can be easily used in any location where a group of people can sit together. It is most commonly used for addictions, behavioural health, disasters & emotional trauma. It is a technique that is versatile, effective and economical.

Completion of the full 70 hours of training (approx. 24 didactic / 46 clinical) will enable trainees to treat clients with this technique. After this intensive workshop, trainees will be able to begin the clinical component. The remaining practicum hours will be completed with the supervision of the trainer, either directly, or as otherwise agreed upon by the trainee and trainer. It is the responsibility of trainees to determine what provincial regulation may be in place, and if they are operating as a private practitioner, whether or not they may practice the protocol within their usual scope of practice.

Upon completion of all course requirements, trainees can apply to NADA for a completion certificate as an Acupuncture Detoxification Specialist (ADS).

The cost for this training is **\$600 (plus HST)** and includes all course materials, evaluation and supervision for the duration of your practical hours. Payment must be made by November 8, 2021 by e-transfer or money order.
